## MINI TRACK LOADERS

Bonfiglioli's electric version of the track drive combines the validated gearbox design with an air-cooled permanent magnet motor, offering a compact package that equals and even exceeds the propulsion and thrust performances of conventional machines, because power and torque are immediately available to the electric motor at every operating speed. Additionally, as the track gearboxes are electrically driven, the machine can work in sensitive areas where emissions and noise are a concern, even on night shifts. Lastly, electric motors are virtually maintenance-free, allowing for longer maintenance intervals.
