Engineering Solutions

WWW.BONFIGLIOLI.COM

Agriculture & Forestry

THE MOST RELIABLE SOLUTIONS FOR AGRICULTURAL AND FOREST MACHINERY

With almost 50 years of experience alongside major players on the market, Bonfiglioli is able to create, design and produce tailor-made drives for a wide range of applications in the agricultural sector, such as sprayers, harvesters, feed mixers and forest machines.

Through innovation, reliability, efficiency, cost-optimization and flexibility, Bonfiglioli experts help you to meet your customers' needs and requirements.

The vast range of customised solutions and extensive expertise in the industry make Bonfiglioli the ideal partner for all manufacturers of agricultural and forest machinery.

Furthermore Bonfiglioli offers integrated electric powerdrives replacing the conventional hydraulic application. The electrification of small AGRICULTURAL MACHINERY machines in their main functions is a first step ahead, improving efficiency, reducing CO2 emissions and noise levels.

SPRAYERS

FORAGE HARVESTERS

SUGAR CANE HARVESTERS

POTATO HARVESTERS

GRAPE HARVESTERS

WHEELED AGRICULTURE MACHINES

The Bonfiglioli 600W Series is the best solution when designing wheeled off-road machinery. With a compact design, high torque and load capacities, a negative multi-disk parking brake and an optional disengagement device to tow the vehicle in an emergency, these solutions precisely match the application requirements.

600 Series Wheel drives

BENEFITS

- Rotating housing flange with studs to fit wheels and drums
- Rugged design
- High torque capacity
- High load capacity
- Mechanical lifetime seals
- Compact design
- Optional mechanical gear disengagement on request

FEATURES

- Up to 4,000 rpm
- Hydraulically released parking brake on request
- Cartridge axial piston hydraulic motors
- Flanged axial piston hydraulic motors
- Prearranged for hydraulic and electric motors
- Dynamic & service brake
- Electric version available on request

WHEELED AGRICULTURE MACHINES

With a series of reliable products for wheeled agricultural machines, Bonfiglioli offers machine builders a range of excellent drive systems. In this version Bonfiglioli also includes its design for the high efficiency hydraulic motor TH68 in both versions (2-speed and variable speed).

600WT Series

Wheel drives

BENEFITS

- Spring-applied hydraulic-release integrated parking brake
- Faster, easier installation on the machine
- Mechanical gear disengagement

FEATURES

- Motor:
 - Integrated variable swash plate
 - Available with both hydraulic two position or electric proportional variable displacement control
 - Zero displacement capacity
- Input speed: up to 4,000 rpm
- Gear ratios: 22 ... 53
- Brake options
- Speed sensor
- Dynamic service brake with inspection port, directly serviceable from the motor side (no need to remove it from the machine)
- Main options: Dynamic & service brake

WHEELED AGRICULTURE MACHINES

Bonfiglioli's 600W planetary wheel drives can be coupled to a high-power density electric motor, instead of a conventional hydraulic motor. This complete mechatronic solution is designed for a high voltage hybrid powertrain system and was originally conceived for self-propelled crop sprayers.

600WE Series

Wheel drives

BENEFITS

Benefits for OEMs

- Ability to downsize and downspeed combustion engines
- Easy installation: electric solution dimensions comparable to standard hydrostatics
- Higher system reliability, fewer mechanical parts
- Virtually maintenance-free electric motors
- From wheel bolt to electric wire with only one supplier

Benefits for end users

- Reduced fuel consumption
- Increased productivity
- Better machine maneuverability
- The electric solution is cleaner: lower risk of oil spills

FEATURES

- Multistage planetary gearbox
- Rotating housing output
- Validated in the field
- Low noise

- Permanent magnet motors
- Suitable for 400-800 Vdc batteries
- Liquid cooled
- Aluminum or cast iron housing
- Protection rating >IP65

TRACKED AGRICULTURAL MACHINES

Bonfiglioli 700C series units are unsurpassed by any crawler or milling machines. Thanks to their compact, rugged design, high torque and load capabilities, and optional mechanical lifetime seals, these solutions are the best possible option for the machine. All units are available with a fail-safe parking brake and most have the option of cartridge type fixed or variable systems.

700C Series Track drives

TRAILED FEED-MIXERS

SELF-PROPELLED FEED-MIXERS

FEED-MIXERS CUTTER DRIVES

With a reliable series of products for feed mixers, Bonfiglioli gives machine builders the best possible choice of wheel drive.

The 300 series is compact and powerful. Its planetary drive train makes it the ideal choice for all heavy duty applications where shock loads and impacts are more the rule than the exception. The product configuration is highly versatile, due with several options for mounting, gear layout, output shaft and motor interface.

300 Series Cutter drives

BENEFITS

- High torque capacity
- High load capacity
- Rugged and compact design

FEATURES

- Hydraulically released parking brake on request
- Foot and flange mounted
- Output shaft: solid with key, splined, splined hollow, hollow with shrink disc
- Flanged axial piston hydraulic motors
- Hydraulic orbit motors
- IEC and Nema motor adapters
- Solid input shaft
- Rotating housing
- Mechanical lifetime seals

FEED-MIXERS

The Bonfiglioli auger drives series provides the safest and most effective solution for the vertical and horizontal screw feed mixers.

The flexibility of the design provides users with several options to meet the needs of their applications..

With a reliable optimized design, the Bonfiglioli 700T Series for auger applications meets all feed mixer requirements. The different interfaces make this series very flexible. The two shafts configuration for the in-line and multi-auger models is a fundamental.

700T Series Auger drives

BENEFITS

- Rugged and compact design
- High torque capacity
- High load capacity

FEATURES

- Gear ratios 15.4 ... 18.3
- Input speed 540 rpm
- Rotating housing
- Mechanical lifetime seals

FELLER BUNCHERS AND LOG LOADERS

The F Series is perfectly suited to any crawler or milling machine. Thanks to compact, rugged design, high torque and load capabilities, these solutions are the best possible option. All units available with a fail-safe parking brake and for most cartridge type fixed or variable systems. Different disengagement systems are available on demand for all the sizes.

F Series Track drives

BENEFITS

- Rotating housing
- Rugged and compact design
- High torque capacity
- High load capacity
- High performance

FEATURES

Gear ratios

- 14 ... 824

Standard features

- Compact structure
- 3-7 Planetary wheels per stage
- Notchless ground tooth root
- Integrated disc-brake
- Mechanical lifetime seals

Special executions on request

- Mechanical disconnect device
- Low and high temperature version

FELLER BUNCHERS AND LOG LOADERS

Bonfiglioli slew drives for forestry machines are the most efficient solutions available on the market today. Highly valued by major manufacturers, the product range benefits from years of field testing. The Bonfiglioli 700T series provides the safest, most effective solution for cranes, excavators and forestry machines. Highly appreciated by all major manufacturers, the 700T Series has long been established in the crane, excavator and special equipment industries.

700T Series Slew drives

BENEFITS

- Flange mounted
- Rugged design
- High torque capacity

FEATURES

- Output shaft: splined or with pinion
- Output shafts supported by heavy-duty capacity bearings

Brake options

- Hydraulically released parking brake on request
- DC and AC type

Applicable motors

- Piston hydraulic motors
- Hydraulic orbit motors
- Electric motors IEC

Motor options

- Pressure relief valve
- Overcenter valve

MULCHER MACHINE

The Bonfiglioli track drive series offers mulcher machine builders a compact design and reliable solutions. A wide range of sizes is available. Bonfiglioli 700C series units are unsurpassed by any crawler or milling machines. Thanks to compact, rugged design, high torque and load capabilities, and optional mechanical lifetime seals, these solutions are the best possible option for the machine. All units are available with a fail-safe parking brake and most have the option of cartridge type fixed or variable systems.

700C Series
Track drives

BENEFITS

- Rotating housing
- Rugged and compact design
- High torque capacity
- High load capacity

FEATURES

- Up to 4.000 rpm
- Hydraulically released parking brake on request
- Cartridge axial piston hydraulic motors
- Flanged axial piston hydraulic motors
- Hydraulic orbital motors
- Electric version available on request
- Mechanical lifetime seals

MULCHER MACHINE

The Bonfiglioli track drive series offers mulcher machine builders compact design and reliable solutions. The 700CT Series offers you the complete drive solution of an hydraulic moto-reducer completely designed by Bonfiglioli. High performance and efficiency in an unique solution are the big plus of this choice. Configurations with 2-speed or variable speed are available.

700CT Series

Track drives

BENEFITS

- Compact, lightweight design
- 2 speed and variable speed configurations available
- Motor-gearbox integrated solution

FEATURES

- Integrated motor-gearbox powered by hydraulic motor developed with Danfoss
- Rotating housing
- Pressure relief valve (shockless type) on request
- Anti-cavitation valve on request
- Multiple ratios
- Integrated disc-brake

WHEELED AGRIROBOT

UGV VEHICLE

SOLUTIONS FOR Agriculture & Forestry

600WE Series
Wheel Drives

MP + BMD MOTOR Series
Steering Drives

BENEFITS

- Compact dimensions
- Low noise
- High efficiency
- Maintenance free motors

- Compact
- High performance
- High torque in a limited space
- Reduced TCO
- Easy maintenance
- Low noise
- No polluting emissions

FEATURES

- Multistage planetary drive
- Optimized gear design for maximum efficiency and minimum noise
- Integrated, low voltage, 3 phase PM or induction motor
- Integrated, high accuracy, temperature sensor
- High resolution, hall effect speed sensor
- Motor protection rating degree up to IP67

- Permanent magnet motors
- Suitable for 48-400 Vdc batteries
- Air cooled
- Aluminum housing
- Protection rating >IP65
- Precision steering thanks to low backlash

WHEELED & TRACKED AGRIROBOTS

With a series of reliable products for wheeled AGV Robot, Bonfiglioli offers machines builders a range of excellent drive systems.

Bonfiglioli portfolio guarantees performances including high torque in a compact space with limited axial dimensions. The electric drives includes a maintenance- free compact electric motor, which offers comparable dimensions to the hydraulic one.

700CE Series
Track Drives

BPM MOTOR Series
Pump Drives

BENEFITS

Extra features

-
- **INTEGRATED DYNAMIC AND PARKING BRAKES**
 - **CENTRAL TIRE INFLATION SYSTEM**

Integrated dynamic and Parking brakes
for 600 Series Wheel Drives

BENEFITS

- Compact and modular design
- Compliant with international regulations for service, emergency and parking braking

FEATURES

- Improved modularity of service brake actuation
- Integrated oil immersed brake disc package
- Dedicated piston return system for optimized thermal performance
- Heavy duty discs to maximize thermal capacity for best energy dissipation, even under extreme conditions

P1: static brake port
P2: service brake port

ACTION	P1 PORT	P2 PORT

610 X	800	150	1.100

The above data are for reference only. To be verified based on actual machine data.

609W2 wheel drive with integrated CTIS

Tire pressure control while driving

BENEFITS

Improved Mobility

- Increases traction when driving off road, in sand, mud, etc.
- Allows higher vehicle speeds and fuel saving during on-road transfer

Reliable Performance

- Eliminates tire leak down: seals and control hoses are isolated from tires and not pressurized during normal operation or when parked.
- The system covers the complete machine lifetime without maintenance
- Allows continuous vehicle operation with less Tire wear

FEATURES

- Operator panel in the cabin
- Pre-selected menus depending on load and terrain types
- Automatic over-speed protection inflates tires to a pressure related to vehicle speed
- Tire maintenance feature checks and maintains pressure at selectable time intervals
- Multi-channel pressure control available by axle groups.
- Integrated diagnostics alerts driver of potential tire problems and system status

CENTRAL TIRE INFLATION SYSTEM

AIR PRESSURE CONTROL

CTIS stands for **Central Tire Inflation System**. It is a system which allows the wheel vehicles Tire pressure control while driving.

This means **the operator can modify the air pressure without leaving the cabin**, adjusting it according to the soil conditions and operation needs.

CONTROL SYSTEM

Bonfiglioli CTIS-ready wheel drive consists in a new gearbox design that includes a special air passage system inside. It has been designed for machines already equipped with the Tire inflation control system.

This maintains the same overall dimensions, to integrate and protect the component with only the two threaded connections for the air hoses.

These advantages are achieved with **basically no outline dimension change compared to a standard wheel drive**, thanks to the compact internal design.

Our worldwide presence

Thanks to an international network of closely interconnected commercial and production sites, we can guarantee the same high standards of Bonfiglioli quality anywhere at any given time. We know that our direct presence in local markets is the key to long-lasting success, so our family includes 17 production sites, 23 commercial sites and more than 550 distributors around the world.

Our organization is always close by, offering complete and efficient solutions and supporting our customers with dedicated services, co-engineering and after-sales assistance.
